

Altieri (Altieri Sebor Wieber LLC) has engineered systems for iconic cultural, educational, and landmark buildings, makerspaces, distinguished private residences, and the like for 60 years. It is our mission to design highly inventive engineering solutions with an unwavering commitment to the creative visions of our clients and to the quality, character, and integrity of the architecture.

We are known for our considerable expertise in special systems serving complex museum and performing arts venues, college and university buildings, and highly-controlled, architecturally challenging environments. We are honored by our well-earned reputation for delivering seamless integration of these systems within the architectural and landscape context, for our commitment to excellence in the design of responsible energy solutions, and for the relationships we develop with our clients. New and long-term clients cite our "unrivaled multi-disciplinary expertise," "gold standard of creative design," exceptional attention to detail, and outstanding team coordination.

A distinct hallmark of Altieri's on-going success is the steadfast commitment to quality of our 60-member team. With our Principals and senior staff involved in the design and direction of each and every project, our clients are assured that we are valued partners from start to finish.
