

ADAM J. TROJANOWSKI

P.E., LEED® AP, PRINCIPAL

Adam Trojanowski joined Altieri in 2004 as a senior mechanical engineer, after nine years with Ove Arup & Partners, in New York and London. He was made a Principal in 2011. Adam has considerable expertise in the design of specialty mechanical systems for highly-controlled environments and architecturally challenging projects such as the renovation and expansion of Yale University's School of Art and Architecture and the new Barnes Foundation in Philadelphia.

Adam continues to push Altieri's museum HVAC design philosophy forward through the pursuit of low-energy, sustainable design methods. His exceptional organization skills are key to the long-running relationships he has developed with our clients, and the overall project guidance he provides ensures that Altieri's designs prioritize the quality, character, and integrity of the architecture and maintain the architect's vision as our paramount intention.

Adam teaches a course in Systems Integration at Yale University's Graduate School of Architecture, and when he is not running up to New Haven, can be found running half marathons and other long distances.

EDUCATION

Master of Science – Civil & Environmental Engineering
Carnegie Mellon University

Master of Science – Mechanical Engineering
State University of New York

Bachelor of Science – Mechanical Engineering
State University of New York

EXPERTISE

Highly controlled museum environments
Creative engineering design
Design team coordination
HVAC systems design
Systems integration
