**ALTIERI OPENS BOSTON OFFICE**

Positioned to better serve clients in the region.

**Norwalk, CT (March 26, 2021)** Altieri is excited to announce the opening of its new office in Boston. With the expansion, Altieri is strengthening relationships with valued clients and developing new associations in Boston and the Northeast region. For over 60 years, Altieri has differentiated itself by aligning its design aspirations with those of its architectural clients and anticipating the impact architectural visions have on Altieri's system designs. Altieri has worked on projects in the region since the mid-1980s. The firm's first project in Boston was a mechanical systems assessment at the Boston Public Library. Altieri has recently returned to this venerable institution, providing master planning services for the historic McKim Building.

"We are excited that this new office enables us to provide closer support to existing and new clients in Boston and the surrounding region, meeting design challenges with solutions that set the pace for a sustainable future," says Michael Freliech, P.E., Principal and head of Altieri's new office.

**About Altieri**

Altieri has provided MEPF engineering design services to architects and building owners since 1959. The firm's reputation as an industry leader is based on the seamless integration of systems within architecturally challenging environments. Altieri has been entrusted with designing optimal environments for scores of cultural, educational, community, historic, and private residential projects around the country including Museum of Fine Arts Boston, The Obama Presidential Center in Chicago, Brown University Granoff Center for the Creative Arts, The Goel Center for Theater and Dance at Phillips Exeter Academy, and the Rock and Roll Hall of Fame in Cleveland. In 2020, the firm was awarded the Architectural Engineering Institute Most Innovative Project Under \$100M for its work at the Corning Museum of Glass, Contemporary Art + Design Wing and Amphitheater Hot Shop. Prioritizing environmentally responsible design has been a distinction of the firm's work since the early 1960s. Significantly, The Getty Center received LEED® Silver certification more than a decade after design completion, based on Altieri's designs from a period predating the introduction and implementation of the LEED® process. Today, over 40 of Altieri's projects have been awarded LEED® certification. A certified Small Business Enterprise (SBE), Altieri is noted for its multi-disciplinary expertise, inventive design, attention to detail, and outstanding team coordination.
