

Vladimir Goldin has been with Altieri since 1985. He designs HVAC systems and is responsible for the overall management of significant projects in the firm's portfolio. Vladimir's resume includes the design of the HVAC system for the first LEED-certified museum in the United States – the Visitor Center at the Mark Twain House & Museum in Hartford, Connecticut.

Vladimir was the project manager and lead engineer for the new off-campus high-rise multi-use facility at the Columbia University School of Social Work. He also managed and led HVAC design for two new buildings at Hamilton College - the Ruth and Elmer Wellin Museum of Art and the Kennedy Center for Theatre and the Studio Arts. Vlad regularly manages some of our most demanding distinguished private residence commissions.

Education

Belarusian State Polytechnic Institute
Minsk, U.S.S.R.
Diploma in Mechanical
Engineering
